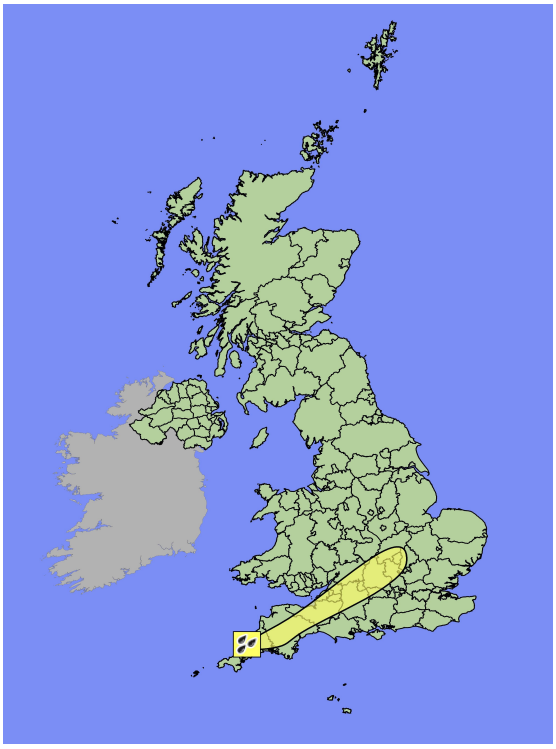
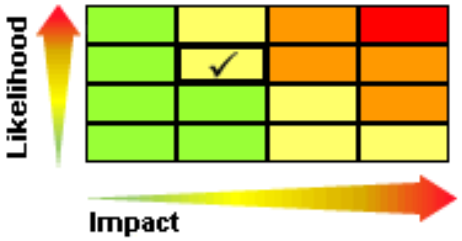
National Severe Weather Warning Service





Chief Forecasters Assessment
A slow moving, narrow band of showers is expected to develop today extending northeastwards from Cornwall. Whilst some places could stay dry, others may see rainfall amounts exceeding 15mm in 1 hour, which could lead to local flooding issues given recent rainfall and saturated ground.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **12:00 on Fri, 27th Apr 2012** until **20:00 on Fri, 27th Apr 2012**

Slow-moving thundery showers are expected to develop in places on Friday, bringing localised downpours with hail and thunder.

The public should be aware that given recent wet conditions, these downpours may lead to local flooding on roads, and both this and hail could cause tricky travel conditions.
